

ICTON 2009 Sponsorship invitation

Dear Sir/Madam

The success obtained in the last 10 runs of the International Conference on Optical Transparent Networks ICTON has been noticed by the attendees count evolution list over the years. To highlight, the last 3 editions had over 300 participants from more than 40 countries (<http://www.itl.waw.pl/konf/icton/statistics.html>).

It is clear the upcoming front of development in transparent access (Next Generation Networks) and ultra-high data rate systems. Several are the players already in the field trying to have their own view implemented. One of the aims of ICTON 2009 (<http://icton2009.av.it.pt>), in this scenario, is to provide strong interaction between the researchers and the economic players, increasing the proximity between continents and views (reason for the symbolic placement in the Azores Portuguese Islands).

The conference will be organized as collaboration between Instytut Łączności, Instituto de Telecomunicações, Universidade de Aveiro and Unversidade dos Açores.

For all these reasons, please consider to be engaged in this exciting and high impact event as a sponsor and participant. Conditions for sponsoring follow.

With the very best regards,
Aveiro,

The general Chair

(António Teixeira)
Instituto de Telecomunicações - Universidade de Aveiro
